	TREPORT MONTH PARENT CONTRACTOR		
Description	A restored wetland occupying some 60 ha of unprotected wetland on the south shore		
	of the Vedder River.		
Photo Gallery	https://flic.kr/s/aHBqjB6ibn		
Geographical	Located east of the town of Yarrow, between the Vedder River Campground on the		
Description,	east and the Southern Railway bridge on the west and from the river's edge and the		
	Vedder River South Dyke.		
Area/Trail Length	This site offers about 6.5 km of trails suitable for hiking, birding and general nature		
	observation. Three of the trail are internal, winding along restored streams and		
	spawning channels, wetlands and ponds. The Kingfisher Trail (1.1 km), the Beaver		
	Loop Train (500 m) and the Street Creek Trail are ideal for viewing of vegetation,		
	birds and other wildlife. The Vedder Rotary Trail South bordering the Vedder River (2		
	km) is ideal for viewing of eagles and other raptors and waterfowl. The South Dyke		
	Trail (2 km) offer a good opportunity for walking with extraordinary views on the Northern Cascade Mountains.		
Seasons to Visit	Year round		
Habitat, Eco system	Unprotected wetland on the riparian area of the Vedder River, with spawning		
Habitat, Eco system	channels, riparian ponds, stands mixed deciduous forested areas, with stands of		
	cottonwoods, red alders, willows and an assortment of riparian shrubs.

	,	Browne Creek Wetlands is a nature park in Chilliwack created by the combined effort a number of organizations, and the participation of a large number of volunteers. Fisheries and Oceans Canada and the Fraser Valley Watersheds Coalition built a spawning-channel network on a riparian area on the south shore of the Vedder River between the Southern Railway bridge and the Vedder River Campground, and a partnership between the City of Chilliwack and the Rotary Club of Chilliwack constructed a network of about 2km of recreational trails along the streams and ponds of the area. The park was officially opened to the public on May 14, 2015.
